

PDC INC. ENGINEERS

Transforming Challenges into Solutions

Location:

Anchorage, AK

Job Title:

Electrical Engineer

Level of Experience:

4 years experience / see details at right

[Reply Here](#)

ELECTRICAL ENGINEER

Offering an excellent opportunity for energetic people to join our team designing world-class projects in a leading edge environment. We offer competitive pay, excellent benefits and challenging work.

Potential duties include design, layout, construction administration services, field review of existing and new systems, application of the NEC to project requirements, product selection and communicating with architects, owners, and other engineering disciplines. Our firm's current and future projects include health care, major airport renovations, utility distribution analysis, laboratory, schools, institutional, industrial, commercial lighting, power and communications system design.

Candidates should have a Bachelor's degree in Electrical or Communications Engineering or a minimum of four years experience in the design of electrical, fire alarm, and/or telecommunications systems. Current and potential RCDD candidates are encouraged to apply.

Microsoft Office Suite and AutoCAD knowledge and application is required. Special considerations for project experience using Autodesk's ABS or MEP products.

Openings are available in our Anchorage office. Wage or salary depends on experience. We are an Equal Opportunity Employer.
