Transforming Challenges into Solutions

## Seward I & T Harbor

PDC prepared an electrical assessment report for Seward's Small Boat Harbor I & T docks, followed by design of site improvements to implement our recommendations.

The report included analysis of existing electrical distribution vessel power and lighting, as well as development of deficiency lists, recommendations, and construction cost budget development.

Design is presently under way for the electrical services for shore connections and dock lighting.

### Client:

Tryck Nyman Hayes

### Location:

Seward, Alaska

### Project Completion:

Design in progress

### PDC Involvement:

- Site Electrical Assessment
- Electrical Design Engineering

### Anchorage:

T: 907.743.3200

F: 907.743.3295

### Fairbanks:

T: 907.452.1414

F: 907.456.2707
